*my*PatientVisit allows patients to securely make payments, update medical records, complete authorization forms such as HIPAA and more while seamlessly flowing data back to Nextech's EHR and Practice Management.

WHY DOES A PATIENT PORTAL MATTER?

To Practices

- Collect copays before a patient's arrival
- Improves your practice's revenue flow while reducing delays in accounts receivable
- Allows data to flow to the EHR and PM, reducing double data entry and potential errors
- Frees up staff time by having patients do the pre-check-in paperwork online, including uploading insurance and identification cards

To Patients

- Collect online bill payments from patients 24x7
- Empowers patients to update their own medical history, insurance and demographics
- Allows remote check-in from the convenience of their vehicle
- Provides a way, on the Web or via mobile app, for patients to feel better connected to your practice, including understanding their financial responsibility
