

PAPER CHARTING VS. EHR:

Debunking Common Misconceptions

An EHR can be more like paper charting than you may realize.
Nextech is designed to keep what you love about paper while
accelerating your workflow.

MISCONCEPTION 1:

Only paper charts put all the right
patient info on one page.

DEBUNKED:

Nextech's EHR is the **industry's
only single-page** chart that gives
users an experience similar to paper.

Dr. Jody Piltz-Seymour
Valley Eye Professionals

"The beauty of your system is that it's like being on a paper chart. I go through the exact same steps and complete the exam before leaving the room. The process is what I would normally do when I was on paper."

MISCONCEPTION 2:

I will need to hire more staff
if I move off paper.

DEBUNKED:

Nextech's EHR streamlines charting.
Clients tell us 86% of charts are
completed by the end of the visit.

Dr. Alexander de Castro
Pediatric Eye Care

"I try to close every chart before the patient leaves the room, which is really great, and leaves me less work to do when I get home."

MISCONCEPTION 3:
I chart very fast and learning
a new system would slow
me down.

DEBUNKED:
Nextech's one-page EHR interface
shortens exams by more than 10%,
saving 60 to 90 minutes every day.

Dr. Silverman
Coastal Eye Institute

***"I never thought that EHR could be faster than paper.
But with Nextech, we are definitely faster than before."***

MISCONCEPTION 4:
The other EHR I tried was
too complicated, so I went
back to paper.

DEBUNKED:
Nextech's EHR is intuitive, custom-
izable, and requires minimal clicks
and tabs compared to other EHRs.

Dr. Arianna Kosakowski
The Eye Center

***"This has been the easiest EHR to get the hang of.
Everything is just on one sheet. It's not a bunch of clicking
around or trying to find different things."***

MISCONCEPTION 5:
EHRs take too long to ramp up,
and I can't afford downtime.

DEBUNKED:
The average practice needs fewer
than 48 hours of downtime when
implementing Nextech.

Dr. James Murphy
Scarsdale Ophthalmology Associates

***"If Nextech is being implemented at a practice, you can have
the availability of live support staff there. They have a great
way to customize that onboarding experience."***

Just Like Paper Charting — But Better

See how much more efficient your charting workflow can
be with Nextech's EHR. Experience it for yourself!
