

Simplify ASC Communications with a Single Solution

Optimize clinical and ASC communications with Nextech's seamless interface, enabling your practice and surgery center to **enhance staff efficiency, improve documentation accuracy, and elevate patient care.**

"The Nextech ASC platform is great for Nextech EHR and practice management system users who want a seamless transition between clinic and OR. The familiar interface and workflow make it easy to use for providers and staff. The efficient exchange of information keeps data flowing smoothly from the clinic to the OR and vice versa."

—Neel S. Vaidya, MD, MPH, MBA
Chicago Cornea Consultants

ELEVATE PATIENT CARE

- Quickly validate patient medical history and **reduce manual entry** with shared information from the clinical encounter to the ASC.
- Quick access to customizable operative notes, physician orders, H&P, and billing codes.
- **Pre-populated patient's past history** simplifies data entry for nurses.

COMPLIANCE MADE EASY

- **Increase charting accuracy and compliance** with guided chart completeness.
- Enforce required chart components to be **verified by nursing staff.**

INTUITIVE AND EFFICIENT

- **Intuitive, single-page ASC chart layout** saves time and clicks while documenting.
- Easily customize and modify ASC chart data. Then share this data back to the EHR in **fewer than 30 seconds.**
- Eliminate redundant data entry with **data sharing that prepopulates the ASC chart.**
- **Save up to four minutes per patient** in just one click when sending facility and charge entries from the ASC back to the EHR.

SEAMLESS INTEGRATION

- **Quickly send data** from the EHR clinical records directly into the ASC chart.
- Review ASC surgery entries created directly from the clinical record.
- Streamline data entry and seamlessly integrate appointment details, charges, and anesthesia billing details.
